**THE WINNIPEG RENOVATION**

Show is the optimum time for home renovation companies to interact directly with their clients, both established and potential. All Canadian Renovations (ACR) is a yearly participant and a contributor to the show's Lifestyle Stage with an insider perspective designed to advise homeowners on navigating the renovation process.

Curtis Breslaw, ACR principal, will be speaking from Jan 10 to 12 on the importance of hiring a Certified Master Renovator through the Manitoba Home Builders' Association as well as providing more information as a Certified Aging in Place Specialist (CAPS) designation.

The title for his 2020 presentation is "Renovation Pros and Woes" a must-see event that lays the foundation for a successful renovation outcome. Those who purchase Winnipeg Renovation Show tickets on-line will receive a \$2 instant discount courtesy of ACR.

This year, ACR was excited to award a \$10,000 bathroom renovation to Tara and her family who had entered the 2019 Winnipeg Renovation Show "win a free bathroom" contest courtesy of ACR and its partners.

Curtis recalls how happy Tara was during the phone call informing her of the win and how timely it was for this growing family to upgrade their main bathroom.

The renovation involved a total gutting of the bathroom down to the studs and then the installation of a new bathtub and shower surround, custom vanity and countertop, new flooring and the requisite upgrades of exhaust fans and shower valves.

ACR partnered with other leading vendors who provided pre-selected products towards the renovation that included The Ensuite, Kohler, Visions Cabinets, Flo Form Carpets for Less, and Home Depot.

Tara and her family were thrilled with the final result and Curtis and his team were happy to oblige by contributing their skills and products to this deserving family.

ACR has celebrated its 17th year in the Winnipeg marketplace as a leading home renovation company. The company employs 16 full-time staff positions and calls on a reliable corps of sub-contractors for specialty work.

ACR has achieved certification as Master Renovator thanks to its many years of collective trade experience as well as being awarded the Renomark

designation by the Manitoba Home Builders' Association. The company has also garnered multiple awards for its innovative design solutions and authenticity in renovating character homes.

Another aspect of ACR's skill portfolio is its Certified Aging in Place Specialist (CAPS) designation. "More and more people want to remain in their homes for as long as possible. At ACR, we can assist folks to do this by making their homes more accessible."

Curtis cites a client service process that has been refined over the length of the company's history to make the home renovation as easy as possible.

"From the initial consultation to project completion, we work with you every step of the way to ensure that you get exactly what you want from your renovation."

Curtis and the ACR team look forward to another exciting year at The Winnipeg Renovation show 2020 from Jan to 10 to 12, connecting with Winnipeg homeowners.
